

## Ignition Adapter 1

© This adapter is for the Nissan NEO straight 6 (ER34, WNGC34) motor. It will remove the ignition circuit check engine light caused from ignition channel wiring.

## Ignition Adapter 2

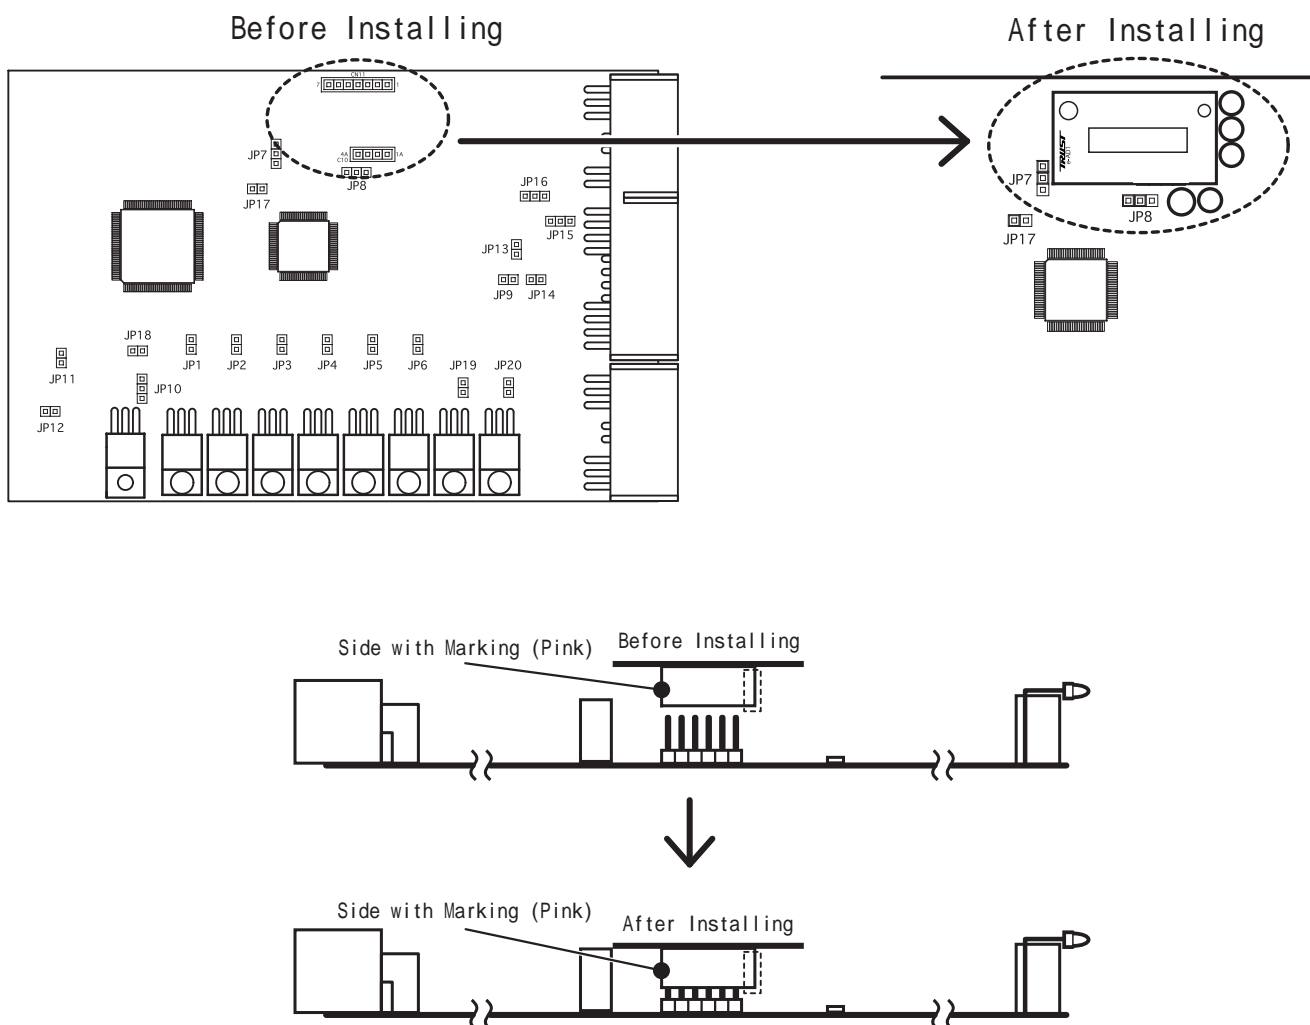

© This adapter is for the Mitsubishi Lancer Evolution (CT9A). It will remove the ignition check engine light and fuel cut caused from ignition channel wiring.

## Ignition Adapter 1

© This adapter is for the Acura NSX (NA1). It will remove the ignition check engine light and fuel cut caused from ignition channel wiring.

### 〈 How to Connect 〉

- View the diagram below for installing the adapter. Align the CN11 number 1 pin (furthest to right side) with the pink marking on the side of the adapter.

※ Please use caution when installing the adapter to the e-manage Ultimate.
